OEO Classes

- ~~Data space projects [Anna Lena]~~
- Release process does not generate inferred hierarchy
 - <https://github.com/OpenEnergyPlatform/ontology/issues/1124>
 - Question at @EA: is this already solved?
 - release with not generated inferences and add a note, that some axioms are missing
- ~~Relationship between "time series" of the OEO and "time sampled measurement data set" of the IAO~~

~~[Anna Lena]~~

- <https://github.com/OpenEnergyPlatform/ontology/issues/1694>
- related term: <https://github.com/OpenEnergyPlatform/ontology/issues/1700>
- STATO import [MS, CHK]
 - <https://github.com/OpenEnergyPlatform/ontology/issues/1133>
 - are there more interesting entities that we should add?
 - use case: danish energy energy for LOD-GEOSS
 - Frage ist noch offen, ob uncertainty limit und confidence limit hier das gleiche sind
 - verschieben in den milestone 2.3.0
- Duplicate annotation properties imported from iao and bfo [MS]
 - <https://github.com/OpenEnergyPlatform/ontology/pull/1754>
 - <https://github.com/OpenEnergyPlatform/ontology/issues/1756>
 - any idea how to fix that nicely and in a lasting way?
 - Possible solution: <https://github.com/ontodev/robot/issues/1099>
- preparing release milestone 2.1.0/looking at open issues
 - issue update iao import #1700
<https://github.com/OpenEnergyPlatform/ontology/issues/1700>
 - journal article has two parents (report and publication)--> goes against our mono hierarchy--> maybe we can leave publication out

- PR #1754 check and approve
- check classification of policy
<https://github.com/OpenEnergyPlatform/ontology/issues/1684> --> wird geschlossen mit iao import
- reuse ENVO <https://github.com/OpenEnergyPlatform/ontology/issues/812>
 - Entscheidung offen, ob importieren oder copy paste relevante Definitionen
 - wird verschoben
- Axioms of model <https://github.com/OpenEnergyPlatform/ontology/issues/1060>
 - we have to revisit it, because of the restructuring --> Eugenio takes a look at it
